

Redispan *Modular Conveyor Solutions*®

MOSJOEN CARBON PLANT PROJECT

In 2007 **Redispan** was contracted by Bechtel, on behalf of Aluminium giants Alcoa and Elkem ASA to design and supply turn key conveyor packages their new Carbon anode plant in Norway.

Geographically situated on Norway's coast, 150 kilometres south of the Arctic Circle, and within close proximity to the township of Mosjoen, the new plant is to produce 280,000 tonnes of anodes annually.

Redispan's Scope of supply included:

- Design and supply of coke conveyors in Modular form, inclusive of all Transfer Chutes and dust filters.
- Design and supply of pre-fabricated conveyor Trestles
- Design and supply of pre-fabricated Transfer Towers.
